CERTIFICATE

Block Alerts Certification of Smart Contract Security

This certificate is awarded to **Arexa AI** in recognition of their commitment to maintaining high security standards and successfully completing a comprehensive smart contract security audit.

Arexa AI

has undergone rigorous security evaluations, including static and dynamic analysis, business logic testing, fuzz testing, and runtime verification. These methodologies ensure adherence to industry best practices and robust protection against vulnerabilities.

To maintain this certification, **Arexa AI** must continue to pass regular smart contract audits and penetration tests, ensuring any changes or additions to the codebase meet the same stringent security criteria.

Block Alerts confirms that all identified vulnerabilities as of the latest audit have been addressed and remediated by **Arexa AI**.
